FALL-PLANTED BULBS BRING SPRING'S EARLIEST FLOWERS

Do you fully realize how richly you will be rewarded if you plant in the Fall?

In the Spring we all get the "planting fever" in our blood because Nature reveals itself so beautifully at that time. The Spring planter reaps his harvest of blooms, cheer and pleasure when the latest one planning his planting.

So plant when others don't think of planting and reap bountifully in Flowers in the very early Spring—when flowers are most appreciated as heralding the end of Winter!

By planting now you will feel well repaid on beholding these beautiful floral hardy bloomers of Spring on your own property next March or April, and receive the pleasant comments of your neighbors and friends.

But he who plants in the Fall steals a march on nature and has the first flush of bloom when the other planters are there with their flowers.

**TIME TO PLANT BULBS**

October and early November is the earliest time for planting bulbs. By careful selection of the right varieties of bulbs to plant, the gardeners can have flowers from early January until late March.

**HYACINTHS**

**GIVE COLOR AND PERMEFUME**

Beautiful for a mass of color and abundance of perfume, the hyacinth is as small in its top as it is large in its bulb. They require little care and will grow in almost any soil. The bulbs are best planted in September or early October.

**DEPTHS AND SPACING**

Cover each bulb with 2 to 3 inches of soil. The bulbs should be set 3 to 4 inches apart. In heavy or dry soils, place 4 to 5 inches apart. Bulbs are set with their roots down and their tops up. The tops of the bulbs should be 2 to 3 inches below the soil surface.

**COTTAGE TULIPS**

COTTAGE TULIPS—May Flowering. These are the hardy tulips. They bloom in late March and early April. They are not as large as the Darwin Tulips and are not as showy. They are ideal for naturalizing in the garden. A mixture of white, yellow, and red is the best for planting in this area.

**Narcissi-Daliolils**

Narcissi-Daliolils and Narcissi-Daliolils are the first to bloom in the Spring. They are the first to bloom in the Spring. They are ideal for naturalizing in the garden. A mixture of white, yellow, and red is the best for planting in this area.

**THE LUCILE BARR**

**HYACINTHS**

BULBS FOR HOUSE PLANTS

We offer a variety of bulbs for house plants that during the Winter will flower freely and bloom a long time.

FREESIA

The long-stemmed, lovely flower, brings the fresia from the South to the Northern home. It is not a plant for the greenhouse but can be grown with success in the window. The bulbs are planted in the fall and should be watered frequently. The blossoms appear in the spring and may be continued for weeks.

PAPER WHITE NARCISUS

A lovely flower for indoor decoration. They require a temperature of about 40 degrees for successful growth. The bulbs are planted in the fall and should be watered frequently. The blossoms appear in the spring and may be continued for weeks.

EASTER LILY

A beautiful flower for indoor decoration. They require a temperature of about 40 degrees for successful growth. The bulbs are planted in the fall and should be watered frequently. The blossoms appear in the spring and may be continued for weeks.

CALLA LILIES

A lovely flower for indoor decoration. They require a temperature of about 40 degrees for successful growth. The bulbs are planted in the fall and should be watered frequently. The blossoms appear in the spring and may be continued for weeks.
